Berenberg and Goldman Sachs
Fifth German Corporate Conference
Munich, Germany

Dr. Jürgen Köhler, CEO

Investor Relations | September 2016
Introduction to SGL Group’s Businesses
Lean organization. Streamlined to two business units and a corporate office

Main shareholders

- SGL ~27%
- BMW ~18%
- Volkswagen ~10%

SGL GROUP
THE CARBON COMPANY

Composites – Fibers & Materials (CFM)*
- Carbon fibers
- Fiber-based materials
- Composite components

Graphite Materials & Systems (GMS)
- Graphite based products and solutions
- Process technology

Performance Products (PP)
- Graphite electrodes
- Cathodes
- Furnace linings
- Carbon electrodes

Corporate Office (T&I and Corporate)
- Corporate Functions & Service Centers
- Technology & Innovation (T&I)
- SGL Excellence (SGL X)

PP carve out finalized and classified as discontinued operations as of June 30, 2016

*Includes stakes of 51% in JV with BMW (proportionally consolidated) and 50% each in JVs Ceramic Brake Discs and Automotive Components (at-equity).
SGL Group snapshot.

- Sales of ~ €1.3 billion in 2015
- Head office in Wiesbaden/Germany with ~ 5,700 employees worldwide
- One of the world’s largest manufacturers of carbon-based products
- Comprehensive portfolio ranging from carbon and graphite products to carbon fibers and composites

- Strong position within each division:
  - CFM: Among Top 3 global carbon fiber producers and no.1 in automotive applications. The only integrated European producer
  - GMS: Leading player in industries with secular growth trends
  - PP (*in process of being divested*): Leading market positions in both graphite electrodes and cathodes
Operations footprint

41 production sites* worldwide and service network covering more than 100 countries

- 11 production sites in North America
- 22 production sites in Europe*
- 8 production sites in Asia

* As of December 31, 2015 including PP. Graphite electrode production facility in Frankfurt-Griesheim (Germany) to be permanently closed down in the course of 2016
Strategic Realignment
**Transformation of SGL Group.** Guided by clearly defined targets

- **Capital increase 2014 and refinancing of convertible bond 2015** created flexibility for restructuring and repositioning.
- **Stop loss makers and cash drainers by restructuring or disposing**
- **Capex for selective growth opportunities subject to minimum hurdle rates**
- **Return on capital is key management principle for strategic realignment and future investment**

---

- **Gearing ~ 0.5**
- **Equity ratio > 30%**
- **Net debt/EBITDA < 2.5**
- **Positive net result**
- **Positive free cash flow**
- **ROCE ≥ 15%**

*Excluding disposal proceeds

**ROCE defined as EBITDA/Capital employed
How we want to achieve our targets.  
Cornerstones of strategic realignment

1) **Right size**  
SGL2015 asset and portfolio restructuring

2) **Improve performance**  
SGL2015 organizational restructuring  
SGL Excellence savings  
BU streamlining  
Process excellence initiatives

3) **Generate shareholder return**  
Define selective growth areas

---

ROCE*  
Minimum return on capital  
15%

*EBITDA divided by capital employed
Strategic Repositioning.
Foundation for sustainable profitable growth

- We want to organically grow our **sales** by more than 50% to above €1.1 billion until 2020 with CFM and GMS.
- Simultaneously, **EBITDA** will grow more than proportionately to sales with a **ROCE** of at least 15%.

- **Legal separation of PP** finalized early June 2016. Prerequisite to flexibly exploit all strategic options.
- At the same time we are **adjusting** the **GE business model** to commodity markets.
- **Discontinued operations** since June 30, 2016, as divestment process progressing as planned.
Performance Products (PP). Market leader in cathodes and #2 in graphite electrodes

- SGL Group is only GE producer with footprint in all 3 major regions EU, NA + Asia

Source: SGL Group’s own estimates, market shares based on volume (excl. China domestic)

*Announcement on 5 August 2015: graphite electrode capacity reduction by 22kt (Japan)

**Russia and China: Potential UHP capacity dependent on equipment, technical capability and needle coke availability

***Various (Chinese & others): various cathode producers combined in this number, none of them exceeding 5% market share

**** SGL Group’s own estimates, market shares based on volume (excl. China domestic); Various (Chinese & others): various cathode producers combined in this number, none of them exceeding 5% market share
Status of PP transaction.
We are confident about a transaction in H2/2016

- Detailed **information package** was sent to numerous interested parties at the end of April after signing respective NDAs

- Access to **data room, management presentations, site visits** for selected interested parties

- Based on discussions with both **strategic** and **financial** interested parties, we believe that a new owner for PP is the best way forward for both SGL Group and PP

- We are confident to **sign** a transaction in H2/2016
What SGL Group will look like in the future
SGL Group’s ambition in the future.
Carbon and graphite enable global megatrends

- We specialize in high-performance materials based on carbon and graphite. We are among the innovation leaders in our markets
- Our technologies enable global megatrends e.g. energy, mobility and digitization
- Our long-term goal is to be the development partner for fundamental solutions based on carbon fibers, graphite and composite materials worldwide

Energy

Mobility

Digitization
Composites - Fibers & Materials (CFM). The only integrated European carbon fiber & composites producer

Carbon Fibers & Composite Materials

- PAN Precursor
  - Fisipe
  - MSP: JV with Mitsubishi Rayon (33%)

- Carbon Fiber
  - Prod. Capacity
    - 4kt in UK
    - 2kt in USA
  - SGL ACF: JV with BMW (51%)
    - up to 9kt in USA

- Composite Materials
  - SGL epo
  - SGL Kümpers (51%)
  - SGL ACF: JV with BMW (51%)

Composite Components

Refocused on materials and automotive / industrial components

- Automotive Composites (50% JV with Benteler)
- Ceramic Brake Discs (50% JV with Brembo)
CFM: Specialist for Composites. Solutions for the material mix of the future

- CFM is the expert for fibers, fiber-based materials, and for composite components. We are the only European carbon fiber products supplier, active along the entire value chain.

- With the development of a new generation of industrial carbon fibers we became the technologically leading company. Such fibers offer the same or even higher qualities as other carbon fibers at lower manufacturing costs.

Value chain for lightweight construction materials based on carbon fibers

- Carbon fiber reinforced plastic is 50% lighter compared to aluminum and 70% compared to steel.
- Significantly lower fuel and kerosene consumption.
- Driver for global CO₂-reduction.
Graphite Materials & Systems (GMS). Leading player in industries with secular growth trends

Best solutions for our customers...

- Full integration to ensure consistent quality
- Most comprehensive portfolio in the industry
- Customers from >35 industries

... in the PV, Semiconductor, and LED Industry
- Meander heater for CZ units
- SiC coated wafer carrier for LED chip production
- C/C carrier frame for solar wafers

... in the Battery and Energy Storage Industry
- Anode material for lithium-ion batteries
- Redox flow battery electrode consisting of battery felt and bipolar plate

... in the Chemical Industry
- Systems & equipment (e.g. syntheses, heat exchangers)
- Flexible graphite foil
- Reinforced graphite sealing sheet

Global market shares 2015*

- Energy: Batteries & Nuclear
- Semiconductor (incl. LED)
- Chemicals
- Tool manufacturing
- Energy: Solar (incl. Polysilicon)
- Metallurgical applications
- Automotive & Transportation
- High-temperature processes

High performance materials enabling our customers’ success

*SGL Group’s own estimates

Page 16

*DC0 Öffentlich - (rauva)
GMS: Development partner for our customers. Solutions based on carbon and graphite

- GMS is a development partner for high-quality graphite-based technological solutions. We offer more than 10,000 products and solutions to over 6,000 customers in 35 industries.
- Our material is used where the specific advantages of graphite are required. These include, e.g. heat and corrosion resistance and thermal and electrical conductivity.
- GMS is a "hidden champion". In many areas, GMS occupies leading technology positions, e.g. in energy saving, ceramic surface coating and sealing materials.

Energy storage
Largest manufacturer of synthetic graphite for the production of lithium-ion batteries

Ceramic surface coating
One of the leading suppliers in the semiconductor industry for graphite based solutions along the entire semiconductor production chain

Sealing materials
World market leader in expanded graphite for companies in the chemical industry
**GMS and CFM.** Both units serve a broad range of fast growing segments linked to global megatrends

Target for GMS and CFM.
Profitable organic sales growth of 50% by 2020

Augmented by potential selective and accretive bolt-on acquisitions to complement our portfolio in terms of region, technology, etc.
Business Units GMS and CFM are the basis of an innovation driven, high growth SGL Group.

- GMS and CFM materials and solutions enable several of the fastest growing economic trends including energy storage, digitization, mobility and urbanization.
- Based on strong positions, GMS and CFM target to further improve their position in the value chain with particular emphasis on innovation, high value-add products, services and engineered solutions.
- Until 2020, GMS and CFM together aim to increase their sales revenue by 50% through profitable, organic growth – potentially augmented by selective and accretive bolt-on acquisitions.
- EBITDA level is expected to increase significantly, exceeding the minimum EBITDA ROCE margin of 15%.
- Organic growth can be financed by own operating cash flow.
Summary: Our course is set.
We are pursuing a clear strategy

- With the PP carve out and its planned divestment we are creating the prerequisite for a sustainable future for SGL Group and the business unit.
- The carve out of the profitable business with cathodes, furnace linings, and carbon electrodes in a separate legal entity within PP creates additional options.
- With our focus on CFM and GMS, our portfolio is better balanced between markets and industries, thus reducing the volatility in our business.
- We command the technologies and innovations to benefit from the global megatrends mobility, energy, and digitization.
- SGL Group fulfills all requirements to achieve the targets for 2020: strong market positions, leading technologies, and committed employees.

Implementation is of highest priority in 2016!
Thank you for your attention!

<td>EBIT*-Margin (in %)</td>
<td>7.8</td>
<td>2.4</td>
</tr>
</tbody>
</table>

- **Sales revenue** decreased mainly due to raw material driven sales decline in textile acrylic fibers, where pricing is based on acrylonitrile/crude oil price development

- **Significant increase in recurring EBIT**
  - Completion of ramp up at SGL ACF (joint ventures with BMW Group)
  - Higher volumes and thus better capacity utilization in our own carbon fiber facilities
  - Low single digit million € profit contribution from HITCO materials business due to finalization of two large orders (not to be extrapolated to full year)
  - Improved result from At-Equity investments (now reported in CFM EBIT)
  - SGL Excellence savings of €1.6 million

* Non-recurring charges of 0.0 million in H1/2016 and 0.1 million in H1/2015
Graphite Materials & Systems. Higher EBIT after adjustment of positive one-time effects in H1/2015

<table>
<thead>
<tr>
<th>in € million</th>
<th>H1/2016</th>
<th>H1/2015</th>
</tr>
</thead>
<tbody>

<td>6.2</td>
<td>7.6</td>
</tr>
<tr>
<td>EBIT</td>
<td>13.1</td>
<td>16.0</td>
</tr>
</tbody>
</table>

- **Stable sales revenue** (no currency impact)
  - Higher sales from solar, semiconductor, and LED industries
  - Offset by weaker North American business which was negatively impacted by reduced demand from energy related industries due to the low crude oil price
  - Demand for graphite (anode) materials for lithium ion battery industry continued at expected stable levels

- **Recurring EBIT** declined 19% primarily due to non-recurrence of positive one-off effects from last year (gain from land sale and insurance compensations). Adjusted for these one-off effects, the operating result improved by €2 million in the first half year 2016

- **SGL Excellence savings** €4.4 million

* Non-recurring charges of €0.4 million in H1/2016 and €0.6 million in H1/2015
**T&I and Corporate.** Significantly lower expenses than prior year period

<table>
<thead>
<tr>

<td>-46.5</td>
<td>-116.7</td>
</tr>
<tr>
<td>Free cash flow from discontinued operations</td>
<td>-40.0</td>
<td>-7.5</td>
</tr>
</tbody>
</table>

- **Cash flow from operating activities** improved strongly by more than €60 million as a result of a higher result from continuing operations before taxes, the reduced working capital buildup in the reporting period, and the non-recurring of negative cash effects from the termination of USD hedges in the previous year.

- **Free cash flow from discontinued operations** included approx. €20 million cash-out for restructuring, particularly relating to the closure of the GE plant in Frankfurt-Griesheim, approx. €6 million for strategic projects (carve out, etc.) as well payments of approx. €16 million in connection with the disposal of HITCO’s aerostructures activities.

*Dividends received, payments for capital contributions in At-Equity accounted investments and other financial assets, proceeds from sale of intangible assets and property, plant and equipment.
Balance sheet. Sufficient liquidity despite deteriorated ratios

<table>
<thead>
<tr>
<th>in € million</th>
<th>30.06.2016</th>
<th>31.12.2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity ratio (in %)</td>

<td>15.6</td>
</tr>
<tr>
<td>Total liquidity (incl. discontinued activities)</td>
<td>161.5</td>
<td>250.8</td>
</tr>
<tr>
<td>Net financial debt</td>
<td>619.9</td>
<td>534.2</td>
</tr>
<tr>
<td>Gearing (net debt/equity)</td>
<td>3.61</td>
<td>1.85</td>
</tr>
</tbody>
</table>

- **Equity ratio** declined due to the net loss of €73 million as well as the further adjustment of pension liabilities in Germany and the US based on lower long-term interest rates (impact on equity: minus €38 million after taxes)
- Higher **net financial debt** reflects mainly the reduced liquidity, resulting primarily from the buildup of working capital, as well as to one-time cash outflows in connection with the closure of the graphite electrode plant in Frankfurt-Griesheim and payments relating to the sale of HITCO’s aerostructures business
- **Liquidity** at end of H1/2016 sufficient to more than cover expected operational cash outflow in 2016
- €200 million **syndicated loan** available and undrawn
- No **maturities** of any of our **financial debt** instruments until **January 2018** (convertible bond 2012/2018)
Backup

Outlook
Business unit outlook 2016. Strong EBIT improvement in CFM accompanied by a stable trend in GMS

- **Composites – Fibers & Materials** (CFM): Close to stable sales and strong EBIT* improvement. Higher sales with fibers and materials for composites to be offset by crude oil based pricing of textile acrylic fibers business. EBIT* improvement based on higher volumes and cost savings. H1/2016 not to be extrapolated to full year as positively impacted by non-recurring high invoicing in HITCO’s materials business during Q1/2016

- **Graphite Materials & Systems** (GMS): Stable sales and stable EBIT*. Weaker demand from energy-related industries particularly in North America and a general economic uncertainty to be compensated by higher demand from solar, semiconductor, and LED industries and continued stable demand from lithium ion battery industry. EBIT* to remain stable despite non-recurrence of positive one-time effects of the prior year due to anticipated higher volume in certain industries and cost savings. ROCE$_{\text{EBITDA}}$ should continue to be close to our min. 15% Group target

- **T&I and Corporate**: Slightly higher expenses due to non-recurrence of positive one-off effects of the prior year
Group outlook 2016. Group KPIs partially benefitting from new group structure

- Full year **Group sales** slightly lower
- **Group recurring EBITDA*** and **EBIT***: Slight increase. Adjusted for positive one-time effects from previous year, EBIT expected to increase significantly
- **Net result** to improve due to lower restructuring and other non recurring expenses but remaining in negative territory
- **Capex** substantially below prior year level and again significantly below D&A of approx. €50 million
- **Free cash flow**: expected on prior year level
  - Improved free cash flow from continuing operations due to better operational result and lower capex as well as non-recurrence of cash out for termination of USD-hedges in prior year
  - Offset by higher cash out for discontinued operations mainly driven by restructuring cash out for discontinued business unit PP
- **ROCE** to improve in line with EBIT and EBITDA development
2016 negative free cash flow more than proportionately skewed to H1.

- H1 showed a typical seasonal working capital buildup plus a scheduled payment to Avcorp (buyer of HITCO’s aerostructure activities) in January 2016 as well as expected restructuring cash out related to Frankfurt-Griesheim site closure in Q2
- Operationally, as expected, free cash flow started to improve from Q2 onwards

</tr>
</tbody>
</table>

- **Lower sales revenue** (-23%) due to
  - price decline in graphite electrodes
  - more than offsetting improvement in remaining PP businesses (cathodes, furnace linings, and carbon electrodes)
  - on the encouraging side, volumes in GE stabilized at low levels and even showed a slight increase compared to the prior year period

- **EBIT** declined to minus €19.8 million from €16.9 million in the prior year period mainly due to
  - renewed price pressure on graphite electrodes
  - cost savings from both raw material price developments as well as from SGL Excellence and other projects (€10.0 million) were unable to compensate for the GE price effect

* Non-recurring charges of €5.1 million in H1/2016 and €4.2 million in H1/2015

Important note.

This presentation contains forward looking statements based on the information currently available to us and on our current projections and assumptions. By nature, forward looking statements are associated with known and unknown risks and uncertainties, as a consequence of which actual developments and results can deviate significantly from the assessment published in this presentation. Forward looking statements are not to be understood as guarantees. Rather, future developments and results depend on a number of factors; they entail various risks and unanticipated circumstances and are based on assumptions which may prove to be inaccurate. These risks and uncertainties include, for example, unforeseeable changes in political, economic, legal and business conditions, particularly relating to our main customer industries, such as electric steel production, to the competitive environment, to interest rate and exchange rate fluctuations, to technological developments, and to other risks and unanticipated circumstances. Other risks that may arise in our opinion include price developments, unexpected developments associated with acquisitions and subsidiaries, and unforeseen risks associated with ongoing cost savings programs. SGL Group assumes no responsibility in this regard and does not intend to adjust or otherwise update these forward looking statements.
