

Broad Base. Best Solutions.

Report on the first half year 2014

**Managing challenges.
Shaping the future.**

Summary

- SGL2015: Streamlining of organization led to new reporting structure – Business Unit Aerostructures (Hitco) reclassified as discontinued operations in Q2/2014
- Group sales in H1/2014 12% below previous year due to price pressure in graphite electrodes
- Recurring EBIT: €1.1 million (H1/2013: €31.3 million)
- SGL2015 savings reached €37 million in reporting period
- Graphite Specialties benefits from good order situation
- Targeted expansion of carbon fiber activities at SGL ACF in Moses Lake
- Outlook for full year 2014 confirmed

Financial highlights (unaudited)

€m	1st Half Year		
	2014	2013	Change
Sales revenue	655.2	747.8	- 12.4%
EBITDA before non-recurring charges	40.9	70.6	- 42.1%
Operating Profit/EBIT before non-recurring charges	1.1	31.3	- 96.5%
Return on sales (EBIT-margin) ¹⁾	0.2%	4.2%	-
EBIT	- 18.6	- 5.9	> - 100.0%
Consolidated net result attributable to the shareholders of the parent company	- 62.1	- 150.1	58.6%

Interim Group Management Report

(unaudited)

Economic environment

In its World Economic Outlook of July 2014, the International Monetary Fund revised its global growth forecast for 2014 downwards, from previously 3.7% (forecast from April 2014) to 3.4%. The growth expectations for 2015 remained unchanged at 4.0%. The anticipated growth developments for 2014 and 2015 thus continue to surpass the 3.0% recorded in 2013.

The IMF identified four primary reasons for the weaker growth expectations in the current year: in the USA, a stronger than expected inventory destocking cycle following the harsh winter left a significant dent in aggregate demand. Additionally, domestic demand in China declined slightly stronger than expected. Russia's economic performance is increasingly being affected by the current geopolitical tensions. Growth perspectives in other developing countries are on the one hand negatively impacted by reduced demand from the USA and China as described above, and, on the other hand, by reduced domestic demand in selected regions.

From a regional perspective, the developed countries continue to show the strongest growth dynamics, as their growth is expected to accelerate from just 1.3% in 2013 to 1.8% this year and 2.4% in 2015. Growth expectations in the emerging countries may be considerably stronger at 4.6% in 2014 and 5.2% in 2015, however, the development is anticipated to be in a similar magnitude as the 4.7% in 2013. For the euro zone, the IMF is expecting an increase in economic performance of 1.1% in 2014, which is comparable to the April forecast. The IMF has increased this year's growth forecast for Germany once again by 0.2%-points to 1.9% following the increase of 0.2%-points to 1.7% in April. The expectations for the USA have been reduced by 1.1%-points to 1.7% compared to the April forecast. Together with Russia, the USA is exhibiting the highest downward growth revisions at 1.1%-points each compared to the April forecast. For China, the experts have only slightly revised their growth expectations to 7.4% compared to the 7.5% anticipated in April.

Key events of the business development

Streamlining the organization within the framework of SGL2015 leads to new reporting structure

The organization was also streamlined within the framework of the cost savings program SGL2015. To further strengthen the operational role of the business units and to streamline management structures, the former business area management tier, which included Performance Products (PP), Graphite Materials & Systems (GMS) as well as Carbon Fibers & Composites (CFC) was eliminated. The business areas also represented the reporting segments. Since February 1, 2014, the business activities are focusing on the five Business Units Graphite & Carbon Electrodes (GCE), Cathodes & Furnace Linings (CFL), Graphite Specialties (GS), Process Technology (PT), as well as Carbon Fibers & Composite Materials (CF/CM). In addition, corporate and service functions, research and development activities in our centralized R&D organization – Technology & Innovation (T&I) – as well as our Six Sigma based SGL Excellence activities support the development of the business units. The Business Unit Aerostructures (AS) resp. the company Hitco Carbon Composites Inc, Gardena (California, USA) was classified as discontinued operations as of June 30, 2014.

The business activities have been reported in the following segments starting from the Q1/2014 interim report: The Business Units Graphite & Carbon Electrodes (GCE) and Cathodes & Furnace Linings (CFL) will continue to be aggregated in the reporting segment Performance Products (PP). In addition, the two joint arrangements with BMW Group (SGL ACF), which have been proportionally consolidated from January 1, 2014, and the Business Unit Carbon Fibers & Composite Materials have been combined to form the reporting segment Carbon Fibers & Materials (CFM). The Business Unit Graphite Specialties (GS) is presented as a standalone reporting segment. The smaller Business Unit Process Technology (PT) is reported together with Corporate T&I and Corporate Costs in the reporting segment Corporate & Others.

Discontinued Operations

Within the context of the Group-wide costs savings program SGL2015, the disposal process for non core activities has been initiated. In June 2014, the management of SGL Group has resolved to sell the company Hitco. With this resolution, the Business Unit AS was reclassified as discontinued operations in the consolidated balance sheet dated June 30, 2014, and in the consolidated profit and loss statement of the first half year 2014. Accordingly, the previous year's profit and loss figures were restated to allow comparison.

The rotor blade activities, which were sold at year-end 2013, were already reclassified as discontinued operations in the 2013 annual financial statements. The prior year's half year income statement figures were adjusted accordingly for the sale of SGL Rotec.

Review of the consolidated financial statements by the Federal Financial Supervisory Authority (BaFin) for financial year 2011

As already reported in the Annual Report 2013, the German Financial Reporting Enforcement Panel ("DPR") performed a random-sampled review of the consolidated financial statements for financial year 2011. As SGL Group did not concur with the results of the review, the Federal Financial Supervisory Authority (BaFin) initiated its own review.

In connection with a review according to Sections 37n ff. of the German Securities Trading Act (WpHG) and in relation to the points specified below, BaFin takes an assessment that differs from the viewpoint of SGL Group's management and that of the auditors of the consolidated financial statements regarding the interpretation of individual accounting regulations and identified inaccuracies in accounting for the financial year 2011.

After detailed examination, the Board of Management decided not to attempt any further steps against the findings of BaFin and to make the corrections as requested.

In particular, accounting treatment of long-term construction contracts and impairment of non-current assets were examined. First, BaFin determined that revenues in the consolidated profit and loss statement of 2011 are overstated because the prerequisites for the application of revenue recognition from long-term construction contracts on the basis of the percentage-of-completion method (IAS 11) for certain contracts at the Business Unit AS (Hitco) were not met. Secondly, BaFin stated that goodwill reported in the consolidated balance sheet 2011 is overstated because impairment tests were performed on the basis of the superordinate Business Area "Carbon Fibers & Composites" rather than on the basis of the Business Units "Carbon Fibers & Composite Materials", "Rotor Blades" or "Aerostructures". In addition, further goodwill impairment losses were not recognized because the discount rates used for impairment testing within these business units were too low.

The above mentioned determinations of error in the consolidated financial statements for the financial year 2011 are reflected for the first time in the report for the first half year 2014, in which the comparative figures for the year 2013 are restated. As a consequence of these corrections, EBIT for financial year 2013 improved by €80.0 million to minus €100.0 million, and the net result for the year improved by €79.4 million to minus €312.7 million. To the extent earlier periods are affected, the corrections have been cumulatively adjusted in the opening balance sheet at January 1, 2013.

These corrections relate to the financial years 2011, 2012 and 2013. The cumulative impact of the error corrections on the balance sheet items till 31.12.2013 is a reduction of equity by €43 million. For income statement items they merely result in a reallocation of results between the years.

Details and in-depth explanations to these restatements are outlined in the Notes to this half year report.

Changes to prior period results due to new accounting pronouncements

The application of the Standard IFRS 11 “Joint Arrangements” is mandatory as of January 1, 2014. Prior year results are presented on a comparable basis. The application of IFRS 11 results in a change in the scope of consolidation at SGL Group. From January 1, 2014 onwards, the two joint arrangements with BMW Group in the US and in Germany (SGL ACF), which so far have been accounted At-Equity, will be proportionally consolidated in the SGL Group financial statements. In the reporting period, the application of IFRS 11 led to higher sales revenues and lower EBIT. Further details on effects resulting from the application of IFRS 11 see the Notes.

Business development

Segment reporting

Reporting segment Performance Products (PP)

€m	1st Half Year		
	2014	2013	Change
Sales revenue	273.9	420.1	- 34.8%
EBITDA before non-recurring charges ¹⁾	26.8	74.4	- 64.0%
EBIT before non-recurring charges ¹⁾	6.8	54.1	- 87.4%
Return on sales	2.5%	12.9%	-
EBIT	2.5	54.1	- 95.4%

¹⁾ Non-recurring charges of €4.3 million in the first half year of 2014

The electric steel industry, which is the relevant segment for our graphite electrode business, continued to be affected by a weak demand environment in the reporting period. This is mainly related to Chinese blast furnace steel overproduction, which, due to insufficient domestic demand, was increasingly exported overseas at very low prices, leading to lower

electric steel production in these regions. The resulting lower demand for graphite electrodes and the ensuing price pressure caused sales to decline by 35% to €273.9 million (H1/2013: €420.1 million) in the reporting segment Performance Products in the first half year 2014. The graphite electrode price level was much higher in the prior year period and started to deteriorate from the second quarter 2013 onwards. In addition, currency effects of minus 2% had a small negative impact on the sales development.

Accordingly, recurring EBIT declined by 87% to €6.8 million (H1/2013: €54.1 million) in the reporting period, resulting in an EBIT margin of 2.5% (H1/2013: 12.9%). The main reason for this development was the price pressure in both graphite electrodes and cathodes. Savings from SGL2015 amounted to €23.4 million in the first half year 2014, of which €5.2 million are attributable to our SGL Excellence initiative.

As previously reported, the graphite electrode facility in Lachute, Canada, belonging to the reporting segment PP, was already closed down at the end of the first quarter 2014 within the framework of the cost savings program SGL2015. On February 13, 2014, the closure of the Italian graphite electrode facility in Narni (Umbria) together with the associated administration in Lainate was publicly announced as the reporting segment PP's second large measure within the framework of SGL2015. The production was phased down in the course of the first half year 2014 and is expected to finally cease during the second half year 2014. The closure of the 30,000 ton graphite electrode facility is a further step in the Groupwide capacity reduction measures to further improve the cost position of SGL Group. Together with the closure of the graphite electrode facility in Lachute, which was announced in October 2013, SGL Group has reduced its graphite electrode production capacity by 60,000 tons p.a. Expenses relating to the closures in Lachute and Narni were for the most part already recorded in the annual financial statements 2013.

Restructuring expenses of €4.3 million were recorded in the reporting period in the reporting segment PP, relating mainly to the facility closures in Lachute and Narni. Accordingly, EBIT after non-recurring charges amounted to €2.5 million in the first half year 2014 (H1/2013: €54.1 million).

Reporting segment Graphite Specialties (GS)

€m	1st Half Year		
	2014	2013	Change
Sales revenue	182.9	151.7	20.6%
EBITDA before non-recurring charges ¹⁾	31.6	13.0	> 100.0%
EBIT before non-recurring charges ¹⁾	22.3	5.2	> 100.0%
Return on sales	12.2%	3.4%	–
EBIT	21.9	5.2	> 100.0%

¹⁾ Non-recurring charges of €0.4 million in the first half year of 2014

Sales in the reporting segment Graphite Specialties increased by 21% (currency adjusted by 25%) to €182.9 million in the reporting period (H1/2013: €151.7 million), mainly driven by the big ticket order awarded to us last year from a customer in the electronics industry as well as by the continued high demand for anode materials from the lithium ion battery industry. Most other customer industries are showing stabilization or even a small recovery in the order intake based on a low level at year-end 2013. While demand from North America is stabilizing, orders from Europe are showing a gradual improvement. Demand from Asia, which is characterized by the solar, the semiconductor and the LED industries, is slowly improving volume-wise; however prices are not yet recovering due to continued global overcapacities and currency related advantages of Japanese competitors.

Based on the improved order situation, which was augmented by the big ticket order, the significantly higher utilization of our production capacities resulted in a substantial improvement in the result of the reporting segment Graphite Specialties. Accordingly, recurring EBIT quadrupled in the first half year 2014 compared to the prior year period to €22.3 million (H1/2013: €5.2 million), resulting in a markedly higher EBIT margin of 12.2% compared to the first half year 2013 (3.4%).

Cost savings from SGL2015 amounted to €6.9 million in the reporting period, of which €3.6 million were attributable to our SGL Excellence initiative.

In the first half year 2014, restructuring expenses related to SGL2015 amounting to €0.4 million were recorded in the reporting segment GS. Accordingly, EBIT after non-recurring charges reached €21.9 million (H1/2013: €5.2 million) in the first half year 2014.

Reporting segment Carbon Fibers & Materials (CFM)

€m	1st Half Year		
	2014	2013	Change
Sales revenue	142.3	114.1	24.7%
EBITDA before non-recurring charges ¹⁾	-6.5	-8.0	18.8%
EBIT before non-recurring charges ¹⁾	-12.5	-14.7	15.0%
Return on sales	-8.8%	-12.9%	-
EBIT	-12.8	-49.4	74.1%

¹⁾ Non-recurring charges of €0.3 million in the first half year of 2014, as well as impairments of €34.7 million in the previous year period

Sales in the reporting segment Carbon Fibers & Materials increased by 25% in the first half year 2014 to €142.3 million (H1/2013: €114.1 million) mainly due to markedly higher sales of the proportionally consolidated joint arrangements with BMW Group, which benefited from the market introduction of the new BMW i3 in November 2013. The Business Unit Carbon Fibers & Composite Materials (CF/CM) also recorded a strong sales increase in the reporting period due to increased demand primarily from the wind energy industry. Currency effects had no impact on the sales development.

Recurring EBIT in the first half year 2014 improved slightly to minus €12.5 million compared to minus €14.7 million in the prior year period, resulting in an EBIT margin of minus 8.8% (H1/2013: minus 12.9%). The continued operational loss is attributable to the ongoing unsatisfactory price level for carbon fibers and the insufficient capacity utilization in the Business Unit CF/CM. However, the operating loss in this business unit has halved thanks to the improved volume demand. This development was partially offset by the expected higher start up losses in our joint arrangements with BMW as a result of the accelerated expansion.

Cost savings from SGL2015 amounted to €1.5 million in the reporting period, of which €1.2 million were attributable to our SGL Excellence initiative.

In the reporting period, restructuring expenses amounting to €0.3 million were recorded in the reporting segment CFM. Accordingly, EBIT after non-recurring charges reached minus €12.8 million in the first half year 2014 (H1/2013: minus €49.4 million).

On May 9, 2014, we announced the tripling of carbon fiber capacities in our joint arrangements with BMW Group in Moses Lake, Washington (USA). Production capacity will be increased from the current 3,000 tons per annum to 9,000 tons per annum due to the high demand for automotive carbon fiber. This will result in Moses Lake becoming the largest carbon fiber production site globally. The facility is currently producing exclusively for BMW along two production lines, each with a capacity of 1,500 tons per annum. The third and fourth production line will already be commissioned in the second half of this year, thus doubling the current capacity to 6,000 tons per annum.

At-Equity accounted business activities within SGL Group

(aggregated results attributable to SGL Group are reported under results from investments accounted for At-Equity)

€m	1st Half Year		
	2014	2013	Change
Sales revenue ¹⁾	100.7	63.3	59.1%

¹⁾ Aggregated, unconsolidated 100% values for all equity accounted companies

Sales of all investments accounted for At-Equity increased by 59% in the first half year 2014 to €100.7 million (H1/2013: €63.3 million, 100% values for companies) and is not included in our consolidated Group sales figure. Main investments accounted for At-Equity are Brembo SGL (Italy and Germany) and Benteler SGL (Germany and Austria).

Brembo SGL

The joint venture with Brembo for the production and development of carbon ceramic brake discs recorded a significant increase in shipments in the course of 2013 due to various serial production launches. A higher order intake was recorded at the end of 2013, resulting in a 70% sales increase in the first half year 2014. Consequently, the production facilities in Meitingen (Germany) and Stezzano (Italy) continue to be nearly fully utilized and will be gradually expanded to meet the further growing brake disc demand for new car models. Having already achieved an operating profit in fiscal year 2013, the positive earnings trend strengthened in the first half year 2014.

Benteler SGL

We develop the use of CFRP components in the automotive industry in our joint venture with Benteler. Numerous projects with various OEMs in the automotive industry were awarded to us, are proceeding according to schedule, and should reach commercialization within the next years. Several production series were launched in 2013, which are in particular being implemented in our new facility in Ort (Austria), so that sales in the fiscal year 2013 increased by approximately 60%. This trend continued into the first half year 2014. In the reporting period, start up losses relating to the serial production launches for new automotive projects were on a comparable level as in the prior year.

Reporting segment Corporate & Others (C&O)

€m	1st Half Year		
	2014	2013	Change
Sales revenue	56.1	61.9	- 9.4%
EBITDA before non-recurring charges ¹⁾	- 11.0	- 8.8	- 25.0%
EBIT before non-recurring charges ¹⁾	- 15.5	-13.3	- 16.5%
Return on sales	- 27.6%	- 21.5%	
EBIT	- 30.3	- 15.7	- 93.0%

¹⁾ Non-recurring charges of €14.8 million in the first half year of 2014, as well as impairments of €2.4 million in the previous year period

As a further measure to optimize our portfolio and focus on our core competencies within the scope of SGL2015, we reclassified our aerospace and defense business, concentrated in the Business Unit Aerostructures (Hitco), as discontinued operations as of June 30, 2014. Accordingly, the figures for the reporting segment Corporate & Others have been adjusted by these activities for the reporting and the prior year period.

At €56.1 million, sales in the first half year 2014 decreased by 9% compared to the prior year period (H1/2013: €61.9 million). Adjusted for currency effects, sales only declined by 8%, driven by the slightly lower sales contribution from the Business Unit Process Technology (PT), which benefited from the execution of a Chinese big ticket order in the prior year period.

The recurring EBIT in this reporting segment declined by approximately 17% to minus €15.5 million (H1/2013: minus €13.3 million). Lower Corporate Costs resulting from SGL2015 measures and slightly lower expenses for Corporate T&I were more than offset by the lower EBIT contribution of the Business Unit PT.

Savings amounted to €5.5 million within the framework of SGL2015, mainly relating to savings from implemented personnel measures as part of SGL2015 as well as lower travel and consultancy costs and cost savings in the Business Unit PT. Included in the SGL2015 savings are €1.2 million from our SGL Excellence initiative.

Non-recurring charges totaled €14.8 million in the reporting period, including, amongst others, expenses relating to personnel changes in our Board of Management as of June 30, 2014. Accordingly, EBIT after non-recurring charges in this reporting segment amounted to minus €30.3 million (H1/2013: minus €15.7 million €).

Group business development

€m	1st Half Year		
	2014	2013	Change
Sales revenue	655.2	747.8	- 12.4%
Gross profit	111.3	155.1	- 28.2%
Selling, administrative, R&D and other operating income/expense	- 110.2	- 123.8	11.0%
EBIT before non-recurring charges	1.1	31.3	- 96.5%
Restructuring expenses/Others	- 19.7	0.0	-
Impairment losses	-	- 37.2	-
EBIT	- 18.6	- 5.9	> - 100.0%
EBITDA before non-recurring charges	40.9	70.6	- 42.1%

Group sales declined by 12% (currency adjusted by 11%) to €655.2 million (H1/2013: €747.8 million) due to the lower sales contribution from the reporting segment PP, which could only be partially compensated by the positive sales developments in the reporting segments GS and CFM.

Gross margin at 17.0% was considerably lower than the prior year level of 20.7% mainly due to the graphite electrodes price pressure in the reporting segment PP.

Compared to the first half of the prior year, selling, administrative, research, and other income/expense decreased by 11% to €110.2 million (H1/2013: €123.8 million), mainly due to the lower selling costs in conjunction with the lower sales as well as SGL2015 savings.

In spite of this, recurring Group EBIT decreased and reached €1.1 million in the reporting period compared to €31.3 million in the prior year period. The EBIT margin declined from 4.2% in the first half year 2013 to 0.2% in the first half year 2014. Cost savings from SGL2015 amounted to €37.3 million in the Group, of which €11.2 million was attributable to our SGL Excellence initiative.

Non-recurring charges in the first half year 2014 totaled €19.7 million and relate mainly to restructuring expenses in conjunction with SGL2015.

Accordingly, Group EBIT after non-recurring charges amounted to minus €18.6 million (H1/2013: minus €5.9 million).

€m	1st Half Year		
	2014	2013	Change
EBIT	- 18.6	- 5.9	> - 100.0%
Result from At-Equity accounted investments	- 3.2	- 6.6	51.5%
Net financing result	- 17.5	- 26.5	34.0%
Result from continuing operations before income taxes	- 39.3	- 39.0	- 0.8%
Income tax expense	- 9.3	- 77.9	88.1%
Result from continuing operations	- 48.6	- 116.9	58.4%
Result from discontinued operations, net of tax	- 12.8	- 33.4	61.7%
Result for the period	- 61.4	- 150.3	59.1%
Attributable to:			
Non-controlling interests	0.7	- 0.2	> 100.0%
Consolidated net result (attributable to the shareholders of the parent company)	- 62.1	- 150.1	58.6%
Earnings per share, basic and diluted (in €)	- 0.87	- 2.12	59.0%
Earnings per share continuing operations, basic and diluted (in €)	- 0.69	- 1.65	58.2%

Results from investments accounted for At-Equity

Results from investments accounted for At-Equity improved to minus €3.2 million in the reporting period compared to the prior year period (H1/2013: minus €6.6 million), mainly due to the positive business performance of Brembo SGL in the first half year 2014. This was partially offset by the negative earnings contribution of the SGL Lindner joint venture (joint venture with Lindner Group for the distribution of graphite based cooling ceilings), which is still in the process of commercialization and required further financial support from the partners in the reporting period. The result also includes the start up losses of the Benteler SGL joint venture amounting to a low single digit million € figure, which is unchanged compared to the prior year period.

We expect an improved result from investments accounted for At-Equity in the full year 2014 compared to the prior year, mainly due to higher production and shipment volumes and lower start up losses.

Net financing result

€m	1st Half Year		
	2014	2013	Change
Interest income	0.5	0.6	-16.7%
Interest expense	-14.7	-9.1	-61.5%
Imputed interest convertible bonds (non-cash)	5.1	-6.9	> 100.0%
Imputed interest finance lease (non-cash)	-0.6	-0.7	14.3%
Interest expense on pensions	-5.4	-6.1	11.5%
Interest expense, net	-15.1	-22.2	32.0%
Amortization of refinancing costs (non-cash)	-1.6	-1.3	-23.1%
Other financial income/expense	-0.8	-3.0	73.3%
Other financing result	-2.4	-4.3	44.2%
Net financing result	-17.5	-26.5	34.0%

The net financing result improved in the first half year 2014 to minus €17.5 million after minus €26.5 million in the prior year period.

The increased interest expenses relate to the fixed rate corporate bond issued in December 2013 with a coupon of 4.875%, which replaced the floating rate note issued in 2007. The latter was equipped with a coupon of three-month-EURIBOR plus a margin of 1.25%, corresponding to an average interest rate of 1.46% in the prior year period.

In the first half year 2014, the net financing result included a gain from the imputed interest component of the convertible bonds (prior year period: loss from imputed interest component). This relates to the revised accounting treatment of the maturity of the convertible bond 2009/2016. The convertible bond was equipped with a one-time investor put option on June 30, 2014, so that the bond was recorded in the balance sheet with a maturity on June 30, 2014. Accordingly, the convertible bond was discounted to this date to its nominal value of €134.7 million (corresponding to the repayment obligation). After the put option was not exercised by the investors, the bond was recorded in the balance sheet with its actual maturity on June 30, 2016. Accordingly, the repayment obligation resp. the present value decreased to €125.1 million. The difference between the nominal and the present value amounting to €9.6 million was recorded as a gain.

The improvement in the other financing result compared to the first half year 2013 is primarily due to the negative translation effects of €1.3 million in the prior year period relating to foreign currency bank debts, which were repaid at the end of the fiscal year 2013.

Result from continuing operations before and after taxes

Due to the developments described above, the result from continuing operations before taxes at minus €39.3 million remained virtually on the same level as in the first half year 2013 (minus €39.0 million adjusted for the discontinued rotor blade and aerostructures activities). Subtracting income taxes of €9.3 million (H1/2013: minus €77.9 million) and non-controlling interests of €0.7 million (H1/2013: minus €0.2 million), as well as result from discontinued operations of minus €12.8 million (H1/2013: minus €33.4 million) the consolidated net result of minus €62.1 million improved compared to minus €150.1 million in the first half year 2013.

Balance sheet structure

€m	June 30, 2014	December 31, 2013	Change
ASSETS			
Non-current assets	1,016.0	1,089.3	- 6.7%
Current assets	868.4	963.4	- 9.9%
Assets held for sale	153.2	6.4	> 100.0%
Total assets	2,037.6	2,059.1	- 1.1%
EQUITY AND LIABILITIES			
Equity attributable to the shareholders of the parent company	538.3	607.7	- 11.4%
Non-controlling interests	16.0	16.2	- 1.2%
Total equity	554.3	623.9	- 11.2%
Non-current liabilities	1,064.4	943.8	12.8%
Current liabilities	369.1	491.4	- 24.9%
Liabilities associated with assets held for sale	49.8	0.0	> 100.0%
Total equity and liabilities	2,037.6	2,059.1	- 1.1%

The decline in the current and non-current assets results from the reclassification of the assets of the Business Unit AS to the assets held for sale line item.

Assets held for sale increased by €146.8 million to €153.2 million as of June 30, 2014. This relates to the intended disposal of the Business Unit AS. The assets and liabilities of the Business Unit AS are recorded as held for sale following the reclassification of the unit as discontinued operations during the second quarter of the fiscal year 2014. The reporting segments PP, GS, and C&O are classified as continuing operations.

The increase in non-current and the decrease in current liabilities compared to the prior year results primarily from the reclassification of the convertible bond 2009/2016 from current to non-current liabilities. After the investor put option of this convertible bond on June 30, 2014, was not exercised, the maturity is extended to June 2016. Accordingly, the new net present value of the convertible bond of €125.1 million is recorded as a non-current liability. Note also our commentary on the net financial results. In contrast, the financial debt of the proportionally consolidated SGL ACF increased by €32.3 million in the reporting period and is recorded in total as current financial liabilities. The increase is related to the expansion of carbon fiber lines in the joint production plant in Moses Lake (USA).

Working capital

€m	June 30, 2014	December 31, 2013	Change
Inventories	468.1	478.4	- 2.2%
Trade receivables	187.2	189.0	- 1.0%
Trade payables	-130.3	-191.2	31.9%
Working Capital	525.0	476.2	10.2%

The development of the working capital was characterized by the reclassification of inventory, receivables and payables relating to the Business Unit AS to the assets held for sale line item as of June 30, 2014. Adjusted for these positions, working capital increased by 7.5%. Lower payables reflect seasonally different delivery terms of raw materials.

Changes in equity

As of June 30, 2014, shareholders' equity amounted to €538.3 million (December 31, 2013: €607.7 million). The reduction is mainly due to, on one hand, the negative consolidated net result of €62.1 million. On the other hand, the adjustment of discount rates for pension provision calculations reduced equity by €20.1 million (after tax). Overall, the equity ratio declined to 26% compared to 30% as of December 31, 2013.

Net financial debt

€m	June 30, 2014	December 31, 2013	Change
Current and non-current financial liabilities	719.3	691.5	4.0%
Remaining imputed interest for the convertible bonds	26.0	20.9	24.4%
Accrued refinancing cost	12.3	13.8	-10.9%
Total financial debt	757.6	726.2	4.3%
Time deposits	0.4	0.0	-
Cash and cash equivalents	161.5	235.1	-31.3%
Total liquidity	161.9	235.1	-31.1%
Net financial debt	595.7	491.1	21.3%
thereof: SGL ACF			
Current and non-current financial liabilities	83.0	50.7	63.7%
Cash and cash equivalents	9.3	7.3	27.4%
Net financial debt without SGL ACF	522.0	447.7	16.6%
Net financial debt SGL ACF	73.7	43.4	69.8%

The retrospective proportional consolidation of SGL ACF led to an increase in net financial debt by €43.4 million to €491.1 million as of December 31, 2013. The financial debt of SGL ACF is provided by BMW Group in the form of shareholder loans.

As of June 30, 2014, net financial debt increased by €104.6 million or 21% to €595.7 million, primarily due to the decrease in cash and cash equivalents to €161.9 million compared to €235.1 million at year end 2013. This development is mainly attributable to the cash outflow related to implemented SGL2015 measures as well as higher capital expenditures for the production capacity expansion at SGL ACF.

Free cash flow

€m	1st Half Year	
	2014	2013
Cash flow from operating activities – continuing operations		
Result before tax from continuing operations	-39.3	-39.0
Restructuring expenses/impairment losses	13.2	37.2
Depreciation and amortization expense	39.8	39.3
Changes in working capital, net	-33.6	-31.6
Miscellaneous items	-3.2	13.3
Cash flow from operating activities – continuing operations	-23.1	19.2
Cash flow from investing activities – continuing operations		
Payments to purchase intangible assets and property, plant and equipment	-60.5	-45.5
Proceeds from sale of intangible assets and property, plant & equipment	1.8	2.8
Payments for capital contributions concerning investments accounted for At-Equity and payments for other financial assets	-3.8	-5.1
Cash flow from investing activities – continuing operations	-62.5	-47.8
<i>Free cash flow¹⁾</i>	<i>-85.6</i>	<i>-28.6</i>

¹⁾ Defined as cash flow from operating activities minus cash flow from investing activities (continuing operations)

In the first half year 2014, cash flow from operating activities – continuing operations amounted to minus €23.1 million after positive €19.2 million in the prior year period, mainly due to payments for SGL2015 restructuring measures in the reporting period. The position “miscellaneous items” reflects lower losses from investments accounted for At-Equity and reduced expenses in connection with management incentive schemes in the reporting period.

As planned, the investments into our established businesses were significantly lower than in the prior year period. This development was more than compensated by the high capital expenditures for capacity expansions at SGL ACF, our joint arrangements with BMW.

As a result, investments into intangible assets and property, plant and equipment increased by €15.0 million compared to the prior year period. Capital injections into investments accounted for At-Equity decreased by €1.3 million compared to the previous year, which was characterized by payments relating to the closure of European Precursor GmbH (EPG).

In total, free cash flow in the reporting period deteriorated to minus €85.6 million (H1/2013: minus €28.6 million).

Employees

The following tables provide information on the headcount development according to reporting segments resp. to geographies:

Headcount	June 30, 2014	December 31, 2013	Change
Performance Products	2,027	2,076	- 2.4%
Graphite Specialties	2,174	2,209	- 1.6%
Carbon Fibers & Materials	1,025	920	11.4%
Corporate & Others	688	711	- 3.2%
Total continuing operations	5,914	5,916	0.0%
Discontinued operations (Hitco)	468	471	- 0.6%
Total SGL Group	6,382	6,387	- 0.1%

Headcount	June 30, 2014	December 31, 2013	Change
Germany	2,312	2,309	0.1%
Europe excluding Germany	1,978	1,988	- 0.5%
North America	881	924	- 4.7%
Asia	743	695	6.9%
Total continuing operations	5,914	5,916	0.0%
Discontinued operations (Hitco)	468	471	- 0.6%
Total SGL Group	6,382	6,387	- 0.1%

The number of employees in our established businesses amounted to 6,198 as of June 30, 2014 (December 31, 2013: 6,284). The decline reflects initial effects from the implementation of SGL2015 measures. Including the proportionally consolidated SGL ACF, the number of employees at SGL Group totals 6,382 as of June 30, 2014 (December 31, 2013: 6,387). The lower number of employees in the reporting segments PP and GS was more than compensated by the increase at SGL ACF in the reporting segment CFM.

Compared to the year end 2012 (6,686 employees), which is the starting point of our cost savings program SGL2015, the number of SGL Group employees (excluding SGL ACF) decreased by 488, of which 339 relate to the sale of our rotor blade activities and the remainder to the organizational and asset restructuring measures. As we are conducting our personnel reduction measures in a socially compatible manner, the main effects from SGL2015 will only be visible in the course of this year and in 2015.

Opportunities and risks

Regarding existing opportunities and risks, we refer to the annual report for the financial year ended December 31, 2013, as well as to the Management Report of this interim report.

Opportunities might result from a more positive development of the global economy and our customer industries. A successful implementation of the SGL2015 cost savings program also offers favorable opportunities for our Company. Our competitive position will be strengthened by an improved cost position, lean administration structures together with more efficient and adapted production capacities. In addition, we see considerable opportunities in the rapidly growing usage of carbon fiber composite materials in the automotive industry, which can significantly improve our mid-term earnings expectations.

At present stage, we continue to see risks associated with the sovereign debt crisis in various regions in the world. This can negatively impact the financial situation of our customers. Governmental policy-driven regulatory measures in relation to tax increases and public spending cuts can negatively affect our business. The economic and political developments in China might have a considerable impact on the demand of our customers'

businesses. With regards to the situation in Ukraine and Russia, as well as the unstable political situation in the Near and Middle East regions, political reactions and sanctions could also result in a negative impact. Besides such regional and global economic trends, we also generally face more subdued, and in certain cases even markedly reduced, demand in our customer industries. Exchange rate fluctuations, such as the sharp devaluation of the Japanese yen and the Indian rupee, increase competitive pressures. Further price reductions of Japanese and Indian competitors are possible. Additional raw material price increases could negatively impact profit margins and may further weaken demand.

In the Business Unit Graphite & Carbon Electrodes, prices for graphite electrodes have substantially deteriorated since the middle of 2013. Overall, the graphite electrode market is characterized by overcapacities also in 2014. The Business Unit Cathodes & Furnace Linings continues to be faced with only slowly increasing investing activities in the aluminum and steel industry. This can have an adverse effect on earnings.

In the Business Unit Graphite Specialties we face cyclical demand fluctuations and overcapacities in some markets. This results in profit contribution risks for individual products, customer industries as well as within various regions.

The risk situation in the Business Unit Carbon Fibers & Composite Materials continues to arise from the weak demand for industrial carbon fibers. Currently, we do not anticipate a sustainable recovery of the market environment in the short term. However, our activities for the build-up of a value chain within the joint operations with the BMW Group are not affected and are developing on schedule. Our business for the production and development of carbon ceramic brake discs operated together with Brembo also developed very favorably. Furthermore, we continue to expect that the fundamental mid to long term growth trends for lightweight materials will stay unchanged.

Risks can arise from sluggish growth in the wind power sector, the reliability of supplies of certain raw materials and the achievement of specific customer quality requirements.

The Business Unit Process Technology is faced with intensive competition for only few large projects that are necessary to achieve our growth objectives.

A further weakening of our business might lead to impairments of fixed assets in some business units.

The Business Unit Aerostuctures classified as discontinued operations bears risks in regards to the intended disposal. The reasonably foreseeable selling price can be above or below the carrying amounts of the related assets and liabilities held for sale. In addition, there is a risk of delayed settlement of the sales process.

The financing agreements of SGL Group contain contractually agreed covenants that regulate compliance with specific financial ratios during the terms. There is a possibility that we may not achieve some of the relevant financial covenants in the following quarters if the difficult business conditions persist or without further measures.

SGL Group is subject to regular tax audits. Based on the expectations and the assessment of management, provisions for possible risks arising from the ongoing tax audits were recorded in the second quarter 2013 which might result in future cash outflows.

Despite the generally unsatisfactory demand and earnings situation, as well as the continued competitive pressures, in our opinion and based on information currently available, there are no material individual risks that could jeopardize sustainably the business as a going concern. Even if the individual risks are viewed on an aggregated basis, they currently do not threaten the going concern of SGL Group.

Outlook

Reporting segment Performance Products (PP)

Graphite electrode pricing have come under increased competitive pressure since the middle of 2013, but seem to be slowly stabilizing on low levels. Nevertheless, we expect both sales and EBIT in the Business Unit Graphite & Carbon Electrodes to decline strongly in the full year 2014, as the price levels in the first half of the previous year were still on a comparatively higher level. Despite the continued uncertainties in the steel markets, we expect a partially seasonal volume increase in the second half year compared to the reporting period. In conjunction with the low price level we therefore anticipate marginal improvements in the coming quarters compared to the reporting period.

With regards to the cathodes business, we note that the aluminum industry is marginally increasing capital expenditures for maintenance and growth projects. Cathode pricing, however, remains under pressure due to overcapacities.

As a result, we continue to expect significantly lower sales and EBIT in the reporting segment PP in the full year 2014, primarily due to the adverse graphite electrode price developments.

Reporting segment Graphite Specialties (GS)

Since the beginning of the year, the Business Unit Graphite Specialties has benefited from the shipments for a big ticket order relating to a new technology in the electronics industry, which was largely processed by the middle of this year, as planned. Excluding this new technology and the continued good demand from the lithium ion battery industry, order intake is improving only slowly from the low levels recorded at the end of last year. Consequently, we still forecast a much weaker second half year compared to the reporting period. Nevertheless, sales and EBIT in the full year 2014 are anticipated to increase substantially compared to the prior year thanks to the strong first half year.

Reporting segment Carbon Fibers & Materials (CFM)

The Business Unit Carbon Fibers & Composite Materials will benefit from a moderate improvement in volume demand primarily from the wind energy industry. In contrast, Fisipe sales will be affected by the shutdown of one production line in preparation for the conversion to precursor.

The joint arrangements with BMW Group, SGL ACF, will in contrast significantly increase their sales in the full year due to the launch of the new i3 in November 2013. The international launch of the i3 as well as the launch of the i8 this year leads to a considerable increase in carbon fiber demand and subsequently higher sales expectations. Accordingly, BMW Group and we have announced the tripling of our carbon fiber capacities in our joint facility in Moses Lake (USA) in May of this year. These high ramp up efforts will lead to slightly higher start up losses at SGL ACF compared to the previous year.

On the whole, the reporting segment Carbon Fibers & Materials continues to expect a significant sales increase and a slight improvement in EBIT.

Reporting segment Corporate & Others (C&O)

In the Business Unit Process Technology, sales in the first half year showed a stable development based on shipments of already booked orders. Due to the restrained order intake activities at the beginning of the year, we anticipate a slightly lower sales development compared to the reporting period. Due to the execution of the Chinese big ticket order last year, the business unit will not be able to maintain the record earnings level of the last two years; nevertheless the EBIT margin is expected to remain close to double digit.

Expenses relating to Corporate Costs and T&I will slightly decline primarily thanks to implemented SGL2015 measures.

In total, we expect slightly lower sales and a stable earnings development for the reporting segment Corporate & Others.

Group

Based on the developments described above, we confirm our guidance for the full year 2014, which we published in March 2014 together with the annual report. Adjusted for the reclassification of the Business Unit Aerostructures (Hitco) as discontinued operations, we expect Group sales on a comparable basis to decrease slightly compared to the previous year. Mainly due to the graphite electrode price development, we expect the comparable recurring Group EBIT to be down significantly compared to 2013.

The major portion of restructuring expenses relating to our cost savings program SGL2015 was recorded in the annual financial statements 2013. Therefore we expect restructuring expenses in 2014 to amount to only a low double digit million-€ figure.

We already achieved €69 million of cost savings in 2013 with SGL2015. Savings in a similar magnitude continue to be expected also for this year. On the whole, we are aiming to generate savings of more than the initially expected €150 million by the end of 2015 with this cost savings program (based on 2012 actual costs).

After a considerable positive free cash flow in 2013 we still anticipate a significantly negative free cash flow in 2014, mainly due to the cash outflow of implemented restructuring measures as well as higher investments in the joint arrangements with BMW. Compared to last year, the planned capital expenditure requirements for our established businesses are significantly lower in 2014.

Notes to the condensed consolidated interim financial statements

Description of business

SGL Carbon SE, located at Söhnleinstrasse 8, Wiesbaden (Germany), together with its subsidiaries ("SGL Group") is a global manufacturer of carbon and graphite products.

Basis of preparation and accounting policies

The interim consolidated financial statements of SGL Group have been prepared in accordance with International Financial Reporting Standards (IFRS) and its interpretations issued by the International Accounting Standards Board, as adopted by the European Union (EU). The interim condensed financial statements as of June 30, 2014, have been prepared in line with the rules of IAS 34 and, with the exception of the changes presented below, using the same accounting policies. The interim consolidated financial statements should be read in conjunction with SGL Group's annual IFRS consolidated financial statements as of December 31, 2013. These interim financial statements contain all of the information that is required for a fair presentation of the results of operations and the financial position of the Group. A third balance sheet is prepared as at the start of the preceding period as the restatements due to the first-time adoption of IFRS 11, Joint Arrangements, and corrections pursuant IAS 8.42, have a material effect on the information in the balance sheet.

The consolidated interim financial statements were authorized for publication in accordance with a resolution of the Board of Management on August 7, 2014. The Interim Financial Statements and Interim Group Management Report have been neither audited nor subject to an auditor's review.

Recently adopted accounting pronouncements

As of January 1, 2014, SGL Group adopted IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements, IFRS 12 Disclosure of Interests in Other Entities and consequential amendments to IAS 27 Separate Financial Statements (as amended in 2011), and IAS 28 Investments in Associates and Joint Ventures (as amended in 2011).

IFRS 10 contains a new definition of control, which is to be applied in determining the companies to be consolidated. This new definition of control leads to no change to the scope of consolidation of the SGL Group. IFRS 11 provides guidance on accounting for joint arrangements by focusing on rights and obligations of the arrangement. Until the end of 2013, companies operated together with a partner were accounted At-Equity by SGL Group. According to IFRS 11, joint ventures are distinct from joint operations. In case of a joint venture, the parties that have joint control of a legally independent company have rights to the net assets of that arrangement. In joint operations, the parties that have joint control have direct rights to the assets and obligations for the liabilities relating to the arrangement. This requirement is also fulfilled if a joint arrangement's production output is almost entirely transferred to the partners. While shares in joint ventures must now be accounted for At-Equity, for a joint operation, the proportional share of assets, liabilities, income and expenses are reported, i.e., it is proportionally consolidated. Upon application of the new standard the two operating joint companies with the BMW Group – SGL Automotive Carbon Fiber in Moses Lake, WA, USA and in Munich, Germany (SGL ACF) – were shifted from At-Equity accounting to proportional consolidation since they market their products directly to the partners and they have no access to external financing resources, therefore classifying these as joint operations.

IFRS 12 provides comprehensive disclosure requirements for all forms of interests in other entities. The implementation of IFRS 12 results in an extension of the disclosures in the Notes.

Discontinued Operations pursuant to IFRS 5

In the reporting period, SGL Group decided to dispose the Business Unit Aerostructures (AS) by means of selling the subsidiary HITCO CARBON COMPOSITES Inc., Gardena, USA (Hitco). The criteria for classifying AS as held for sale and as a discontinued operation in accordance with IFRS 5 were met at the end of reporting period. Accordingly, any income and expenses of AS included in the consolidated income statement was reported under discontinued operations for all the periods presented. In the prior period first half 2013 the Business Unit RB is included, which was disclosed in the annual report as of December 31, 2013 as discontinued operations in accordance with IFRS 5.

Result from discontinued operations

€m	1st Half Year	
	2014 ¹⁾	2013 ¹⁾
Total revenue from discontinued operations	34.7	80.1
Total expenses from discontinued operations	-46.5	-112.8
Result from operating activities of discontinued operations before income taxes	-11.8	-32.7
Attributable tax expense/income	-1.0	-0.7
Result from operating activities of discontinued operations, net of tax	-12.8	-33.4
Result from discontinued operations	-12.8	-33.4

¹⁾ The result from operating activities of discontinued operations for the year represents the result for the period from January 1, to June 30

Hitco's assets and liabilities are shown as held for sale in the balance sheet as of June 30, 2014. The carrying amounts of the major groups of assets and liabilities are as follows:

€m	June 30, 2014
Goodwill and other intangible assets	28.6
Intangibles & property, plant and equipment	82.7
Inventories	23.8
Trade accounts receivable and other assets	18.1
Assets held for sale	153.2
Trade accounts payable and other liabilities	45.9
Provisions	3.9
Liabilities in connection with assets held for sale	49.8

Prior period adjustments

Adjustments according to IAS 8

In connection with an audit according to Sections 37n ff. of the German Securities Trading Act (WpHG), the Federal Financial Supervisory Authority ("BaFin") determined that the consolidated financial statements as of December 31, 2011 were allegedly incorrect. The following cases led to BaFin's determination that the consolidated financial statements as of 31.12.2011 were inaccurate:

- (1) Sales revenue reported in the consolidated income statement 2011 is overstated, because the necessary conditions for the application of IAS 11 for the use of revenue recognition from long term construction contracts on the basis of the percentage of completion method are not met due to the fact that, at the time of the accounting decision, the orders for carbon composite parts to aviation companies were not placed and also uncertain (non-compliance with IAS 18.4).

-
- (2) The value of goodwill of “Carbon Fibers & Composites” reported in the consolidated balance sheet is overstated: firstly, because the impairment test was erroneously performed on the basis of the higher-level segment Carbon Fibers & Composites, instead of on the level of the Business Units “Carbon Fibers & Composite Materials”, “Rotor Blades” and “Aerostructures”, which represent the lowest level within the organization at which goodwill is monitored (non-compliance with IAS 36.55f), and, secondly, because during the determination of the fair value less cost to sell of the business units, the expected future cash flows of the months of October, November and December 2011 were not discounted, and beginning January 2012, discounted at discount rates that are too low (non-compliance with IAS 36.55f).

After detailed examination, the Board of Management has decided not to file an objection against the decision of the BaFin, thus the findings became legally binding. The above mentioned findings have caused the making of a retrospective correction of errors according to IAS 8.42. The corrections are reflected in the consolidated financial statements as at June 30, 2014, in which the comparative figures for the year 2013 are restated and the opening balance sheet for 2013 (January 1, 2013) is corrected to the extent that earlier periods are affected. The cumulative impact of the error corrections on the balance sheet items till December 31, 2013 is a reduction of equity by €43 million.

Adjustments according to IFRS 5

According to IFRS 5, any income and expenses of AS included in the consolidated income statement was reported under discontinued operations for all the periods presented.

Adjustments in accordance with revised IFRS accounting standards

The first-time adoption of IFRS 11 led to the proportionate consolidation of the activities related to the two operating joint companies with the BMW Group.

The following tables provide an overview of the impact of all adjustments:

¹⁾ Net of all income and expenses related to the Business Unit Rotor Blades, which was disclosed as discontinued operations in accordance with IFRS 5

Moreover, as a result of the IAS 8 corrections and the effects from first-time adoption of IFRS 11 relating to the financial year 2013, the condensed consolidated changes in equity, the consolidated statement of comprehensive income and the comparative amounts for 2013 in the Notes also had to be restated accordingly. In addition, a correction of condensed consolidated statement of changes in equity at the time of the opening balance sheet as at January 1, 2013 was necessary.

Segment reporting

Beginning 2014, SGL Group revised its organizational structure in order to further strengthen the operational role of the business units by streamlining management structures. Since this date, SGL Group's business has been conducted by five business units (BUs) in addition to the proportionally consolidated joint operations, aggregated into three segments Performance Products (PP), Graphite Specialties (GS) und Carbon Fibers & Materials (CFM) for reporting purposes. The grouping into segments is based on the business model of each business unit. The following business units remain unchanged to prior periods and are as follows: Graphite & Carbon Electrodes (GCE), Cathodes and Furnace Linings (CFL), Graphite Specialties (GS), Process Technology (PT), and Carbon Fibers & Composite Materials (CF/CM). The Business Unit Aerostructures (AS) was classified as discontinued operations as at June 30, 2014. Previously, the business was conducted by three Business Areas Performance Products (PP), Graphite Materials & Systems (GMS) and Carbon Fibers & Composites (CFC), which also were our reporting segments.

The segment PP aggregates the manufacturing of high-quality graphite electrodes and cathodes, which are used in steel and aluminum production. PP remains unchanged to prior periods and comprises the Business Units GCE and CFL.

The segment GMS was split; its business activities with graphite components (Business Unit GS) is reported separately as segment Graphite Specialties (GS).

The business activities with graphite heat exchangers, columns, pumps and systems (Business Unit PT, which was formerly also part of the Business Area GMS) is the remaining operating segment that is not individually reportable and thus disclosed in the reporting segment Corporate and Others (C&O). Cross-BU corporate research costs incurred to develop growth fields are also reported under C&O, as are corporate costs that comprise expenses for steering the SGL Group.

The segment CFC was also split; its Business Unit CF/CM, which comprise all of the materials business based on carbon fibers, and the proportionally consolidated joint operations, are now combined in the segment Carbon Fibers & Materials (CFM). With this, CFM covers the entire, integrated value chain, from raw materials to carbon fibers and composite materials to finished components for the automotive industry.

Impairment test of goodwill, other intangible assets and property, plant and equipment

Due to the significantly reduced sales revenue and EBIT compared to the prior year in our businesses relating to graphite electrodes (Business Unit GCE) and cathodes (Business Unit CFL) within the reporting segment Performance Products, and the resulting review and adjustments to the assumptions regarding the mid-term development of sales and profitability, SGL Group conducted event-driven impairment tests of goodwill, other intangible assets and property, plant and equipment during the second quarter 2014 for the business units mentioned above. The recoverable amount (fair value less cost to sell) of the Business Units GCE and CFL was calculated using discount factors of 8.2% after taxes. In the Business Unit CFL the recoverable amount deviates only insignificantly from the carrying amount. Future changes in the underlying assumptions for the calculation of the recoverable amount, in particular those which relate to development of sales revenue and profitability, may impact the level of the recoverable amount and lead to an adjustment of the carrying amounts of the assets allocated to the Business Unit CFL. No impairment loss was identified by management.

Pension Obligations

As of June 30, 2014, SGL Group adjusted the pension discount rate by 0.50% in Germany and USA as a consequence of reduced interest rate levels. These discount rates are used to calculate the estimated net present value of pension plan obligations. As of June 30, 2014, the discount rate is 3.00% in Germany (Dec 31, 2013: 3.50%) and 4.25% in USA (Dec 31, 2013: 4.75%). The discount rate adjustments result in actuarial losses of €29.5 million and a corresponding positive tax effect of €9.4 million, which have been included in comprehensive income in the second quarter 2014.

Other disclosures

Joint Operations

Both proportionally consolidated joint operations (SGL ACF) are operated jointly with BMW Group and produce carbon fibers and carbon fiber fabrics for the automotive industry. SGL Group holds a 51% share in each of these companies and controls them together with BMW.

Financial information on proportionally consolidated companies for the first half year 2014 (SGL Group share) is as follows:

- Profit and loss statement: Sales revenue €24.8 million, EBIT: minus €7.2 million, result for the period: minus €7.8 million.
- Balance sheet: Non-current assets €92.9 million (thereof property, plant & equipment €92.8 million), current assets €19.9 million (thereof liquid funds: €9.3 million), current liabilities €101.5 million (thereof interest-bearing loans €83.0 million), and contingencies €65.0 million.

Joint Ventures

At-Equity accounted joint ventures particularly comprise: Brembo SGL Carbon Ceramic Brakes S.p.A, Stezzano, Italy, which is operated together with Brembo and produces and develops carbon ceramic brake discs, and Benteler-SGL GmbH & Co. KG, Paderborn, Germany, operated together with Benteler and develops the use of CFRP components in the automotive industry. SGL Group holds a share of 50% in each of these companies.

The carrying amount of the At-Equity accounted Joint Ventures amounted to €34.2 million at the beginning of the year. After consideration of the share of losses of €3.2 million in the current period (thereof €2.1 million disclosed as contribution commitment liability) and capital measures/adjustments without affecting income of €0.9 million, the carrying amount as of June 30, 2014 was €34.0 million. The 100% balance sheet values as of June 30, 2014 for the two major joint ventures Brembo SGL and Benteler SGL was as follows: current assets €71 million, non-current assets €78 million, current liabilities €39 million and non-current liabilities €50 million.

	1.7			1.7		1.1

The following table shows the breakdown of the assets and liabilities measured at fair value into the three levels of fair value hierarchy in accordance with IFRS 13:

	June 30, 2014			Total
	Level 1	Level 2	Level 3	
Available-for-sale financial assets	11.2	4.7	–	15.9
Derivative financial assets	–	4.3	–	4.3
Derivative financial liabilities	–	1.9	–	1.9

	December 31, 2013			Total
	Level 1	Level 2	Level 3	
Available-for-sale financial assets	11.0	4.8	–	15.8
Derivative financial assets	–	8.7	–	8.7
Derivative financial liabilities	–	1.1	–	1.1

The fair value of the corporate bond recorded at amortized costs was €262.4 million as of June 30, 2014 (December 31, 2013: €258.8 million). The fair market value of the convertible bonds 2009/2016 and 2012/2018 as of June 30, 2014 was €143.0 million and €239.9 million, respectively (December 31, 2013: €150.7 million and €248.6 million, respectively).

Changes to the scope of consolidation

Besides the changes in accordance with IFRS 11 mentioned above, there were no changes to the scope of consolidation as of June 30, 2014, compared to December 31, 2013.

Seasonality of operations

In GCE, our sales revenue fluctuates from quarter to quarter due to factors related to our customers' businesses (production capacity utilization, inventory levels, development of energy costs, etc.). In addition, customers may change their order patterns in response to price changes. For example, customers tend to order additional quantities during the period prior to the effective date of a price increase (and vice versa).

In the Business Units CFL and PT as well as in some businesses in GS, we strongly depend on the investment behavior in our customer industries. Regular maintenance as well as new investments can be postponed. Basically such behavior follows multi-year trends, as such there is no short-term, seasonal demand deducible.

Customer order patterns within the segments GS and CFM primarily follow overall global trends (e.g. for lightweight materials) and depend on the availability in connection with the pricing of such materials. The overall economic environment is usually a first indicator for any developments in the customers' demand.

Other additional information

Issued capital rose to €182.4 million as of June 30, 2014 (December 31, 2013: €181.7 million) and is divided into 71,241,018 no-par value ordinary bearer shares at €2.56 per share. During the first half year of 2014, a total of 223,473 new shares were issued and granted to employees under the employee bonus plan and under the Matching Share Plan. The exercise of SARs from the Stock Appreciation Rights plan resulted in the creation of 1,352 shares. As of June 30, 2014, SGL Carbon SE held a total of 24,513 of its own shares (treasury shares). On January 15, 2014, a total of 589,987 new SARs were granted from the SAR Plan approved during the 2009 Annual General Meeting with a strike price of €29.17. The fair value per issued SAR to be recognized for the expense from share based payments required to be reported under IFRS amounted to €12.01 for the 2014 SARs.

In March 2014, the top three management groups purchased a total of 25,226 shares as part of the Matching Share Plan at a price of €24.08. As of June 30, 2014, there were 3,200,506 SARs, and 114,784 matching shares outstanding. At the beginning of 2014 all remaining grants from the stock option plan lapsed. In March 2014, a total of 166,655 shares on the basis of a capital increase from authorized capital were used to support the employee bonus plan to service the entitlements of the participating employees in Germany, and an additional 53,473 shares were used to service the entitlements of the participants of the Matching Share Plan.

An agreement was concluded in connection with the early termination of the Board membership of Jürgen Muth with effect of June 30, 2014 by mutual agreement. In this context, a provision in an amount of €5.3 million was recorded.

Based on an average number of 71.1 million shares, basic earnings per share amounted to minus €0.87 (H1/2013: minus €2.12).

Changes in the Board of Management

The supervisory board of SGL Carbon SE resolved to terminate Jürgen Muth's appointment as member of the Board of Management and Chief Financial Officer of SGL Carbon SE effective June 30, 2014. The supervisory board appointed Dr. Michael Majerus as his successor effective July 1, 2014.

Subsequent events

None.

Responsibility statement

To the best of our knowledge, and in accordance with the applicable reporting principles for interim financial reporting, the interim consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group, and the interim Group Management Report includes a fair review of the development and performance of the business and the position of the Group, together with a description of the principal opportunities and risks associated with the expected development of the Group for the remaining months of the financial year.

Wiesbaden, August 7, 2014

SGL Carbon SE
The Board of Management

Financial calendar

November 6, 2014

- Interim report on the first nine months 2014
- Conference call for analysts and investors

Important note

This interim report contains forward-looking statements based on the information currently available to us and on our current projections and assumptions. By nature, forward-looking statements are associated with known and unknown risks and uncertainties, as a consequence of which actual developments and results can deviate significantly from the assessment published in our interim report. Forward-looking statements are not to be understood as guarantees. Rather, future developments and results depend on a number of factors; they entail various risks and unanticipated circumstances and are based on assumptions which may prove to be inaccurate. These risks and uncertainties include, for example, unforeseeable changes in political, economic, legal, and business conditions, particularly relating to our main customer industries, such as electric steel production, to the competitive environment, to interest rate and exchange rate fluctuations, to technological developments, and to other risks and unanticipated circumstances. Other risks that in our opinion may arise include price developments, unexpected developments associated with acquisitions and subsidiaries, and unforeseen risks associated with ongoing cost savings programs. SGL Group assumes no responsibility in this regard and does not intend to adjust or otherwise update these forwardlooking statements.
